

HAMILTON COUNTY

JAIL—SOUTH ADDITION

Hamilton County required a facility to meet the changing needs of law enforcement—the evolving role of the Sheriff’s Office and rapidly-growing municipal Police Departments. The space also needed to include a consolidated 911/Emergency Operations Center for compliance with Indiana’s Public-Safety Answering Point (PSAP) Consolidation Program.

PROJECT APPROACH

- Designed expansion on south side of existing jail facility.
- First floor space houses Sheriff’s patrol, detectives, crime investigation laboratories and evidence processing and storage areas.
- New 27-position 911/Communication and Emergency Operations Center expanded into lower-level space formerly housing the old EOC and dispatch area.
- Renovated existing Sheriff’s office to provide space for Sheriff’s administration and record divisions.
- Moved training and other support functions to dedicated facility elsewhere on campus.

RESULT

- Spaces, facilities and equipment meet the County’s ongoing growth and expanding law enforcement needs.
- Sophisticated design and technology supports 24/7/365 consolidated 911/Communication and Emergency Operations Center.

CLIENT	PROJECT ROLES	PROJECT TEAM	KEY ACCOMPLISHMENTS
Hamilton County Board of Commissioners Noblesville, Indiana	Principal in Charge, Architect of Record, and Lead Designer (as RQAW team member)	RQAW Corporation	Functions separated by floor level; renovation for Sheriff’s admin and records; new 911/EOC consolidation; sophisticated design and technology needs.
